How Can I Create Assignments that Teach Ethical AI Literacy?

As AI continues to reshape our world, educators face a critical challenge: understanding and teaching the ethical use of this fast-evolving technology. With AI tools like ChatGPT becoming more common, many educators are uncertain about how to responsibly integrate these tools into their teaching. This is a widespread issue—over 87% of educators haven't received any formal training on AI, despite recognizing its importance. If navigating AI in the classroom feels overwhelming, you're not alone.

Join JJ Wallace, PhD, in a concise yet impactful Magna 20-Minute Mentor to learn practical ways of incorporating AI literacy into your teaching and assignment design. In just 20 minutes, Wallace will provide the essentials for teaching AI responsibly, helping you create assignments that foster ethical AI

literacy. Through a clear overview of AI fundamentals, engaging assignment ideas, and strategies for promoting ethical use, you'll gain the tools needed to prepare students for a responsible, AI-driven future.

Upon completion of this program, you'll be able to:

- Understand what constitutes AI literacy
- Utilize best practices for teaching AI use to students
- Discuss ethical considerations of AI usage
- Develop assignments that incorporate AI tools with clear guidelines
- Evaluate the effectiveness and ethical implications of AI-generated information
- Critically assess AI tools and their outputs
